INDEX OF AUTHORS

AGERON, E. — Voir BORNSTEIN, N.
AGERON, E. — Voir GRIMONT, F.
AGERON, E. — Voir GRIMONT, P.A.D.
AGERON, E. — Voir KHAMMAS, K.M.
AHMEDY, A.M.C., VIDON, D.J.-M., LABIA, R. and DELMAS, C.L. — Relationships between β-lactamase production and β-lactam susceptibility of environmental strains of *Yersinia kristensenii* 667
ALTWEGG, M. and MAYER, L.W. — Bacterial molecular epidemiology based on a non-radioactive probe complementary to ribosomal RNA 325
ANDREMONT, A. — Voir AUMONT, P.
AUBERT, J.-P. — Voir POSSOT, O.
AUMONT, P., ENARD, C., EXPERT, D., PIEDDELOUP, C., TANCRÈDE, C. and ANDREMONT, A. — Production of haemolysin, aerobactin and enterobactin by strains of *Escherichia coli* causing bacteraemia in cancer patients, and their resistance to human serum 21
AVILA-CAMPOS, M.J., FARIAS, L.M., CARVALHO, M.A.R., DAMASCENO, C.A.V., CHARTONE-SOUZA, E. and CISALPINO, E.O. — *Actinobacillus (haemophilus) actinomycetencomitants:* resistance to mercuric chloride of 41 strains isolated in Brazil 51
BARANTON, G. — Voir BARIL, C.
BARIL, C., RICHAUD, C., BARANTON, G. and SAINT GIRONS, I. — Linear chromosome of *Borrelia burgdorferi* 507
BARILE, M.F. — Voir BLANCHARD, A.
BASTIAN, F.O., JENNINGS, R.A. and HOFF, C.J. — Effect of trimethoprim/sulphomethoxazole and hyperbaric oxygen on experimental *Spiroplasma mirum* encephalitis 151
BÉBÉAR, C. — Voir DUTILH, B.
BÉBÉAR, C. — Voir MAUREL, D.
BECK, G., PUCHELLE, E., PLOTKOWSKI, C. and PESLIN, R. — *Streptococcus pneumoniae* and *Staphylococcus aureus* surface properties in relation to their adherence to human buccal epithelial cells 563
BENSON, R.F. — Voir BORNSTEIN, N.
BENZ, R. — Voir BRZOSTEK, K.
BERCOVIER, H. — Voir SILBAQ, F.
BERTRAND, J.C. — Voir BONIN, P.
BÈS, M. — Voir FLEURETTE, J.
BIANCHI, A. — Voir FERRERA-GUERRERO, M.J.
BLANCHARD, A. and BARILE, M.F. — Cloning of *Ureaplasma urealyticum* DNA sequences showing genetic homology with urease genes from Gram-negative bacteria 281
BOCKEMÜHL, J. — Voir LE MINOR, L.
BOLLEN, A. — Voir HOUARD, S.

BONALY, R. — Voir MPONA-MINGA, M.
BONIN, P., GILEWICZ, M., DENIS, M. and BERTRAND, J.C. — Salt requirements in the denitrifying bacterium *Pseudomonas nautica* 617 159
BONNET, J. — Voir DUTILH, B.
BOOS, W. — Voir BRZOSTEK, K.
BORDERON, J.C. — Voir RASTEGAR LARI, A.
BORNSTEIN, N., MARMET, D., SURGOT, M., NOWICKI, M., MEUGNIER, H., FLEURETTE, J., AGERON, E., GRIMONT, F., GRIMONT, P.A.D., THACKER, W.L., BENSON, R.F. and BRENNER, D.J. — *Legionella gratiana* sp. nov. isolated from French spa water 541
BOUDON-PADIEU, E. — Voir SCHWARTZ, Y.
BOUVET, A. — Voir CARLIER, J.P.
BOUVET, O.M.M. — Voir BOUVET, P.J.M.
BOUVET, P.J.M. and BOUVET, O.M.M. — Glucose dehydrogenase activity in *Acinetobacter* species 531
BOUVET, P.J.M. and JEANJEAN, S. — Delineation of new proteolytic genomic species in the genus *Acinetobacter* 291
BRADLEY, D.E. — Conjugation system of IncC plasmid RA1, and the interaction of RA1 pili with specific RNA phage C-1 439
BRANGER, C. — Voir GOULLET, P.
BRENNER, D.J. — Voir BORNSTEIN, N.
BRITO, N., FALCON, M.A., CARNICERO, A., GUTIERREZ-NAVARRO, A.M. and MANSITO, T.B. — Purification and peptidase activity of a bacteriolytic extracellular enzyme from *Pseudomonas aeruginosa* 125
BRUINS, J. — Voir VERSTIJNEN, C.P.H.J.
BRUN, Y. — Voir FLEURETTE, J.
BRZOSTEK, K., HREBENDA, J., BENZ, R. and BOOS, W. — The OmpC protein of *Yersinia enterocolitica:* purification and properties 599
BURNENS, A.P. and VURMA-RAPP, U. — Simplified diagnostic susceptibility testing of mycobacteria against thiacetazone, hydroxylamine, *p*-nitrobenzoic acid and picric acid 235
CARBONNELLE, B. — Voir MOINARD, D.
CARLIER, J.P. and BOUVET, A. — Fermentation products of nutritionally variant streptococci: additional evidence for their classification in the genus *Streptococcus* 119
CARNICERO, A. — Voir BRITO, N.
CARNIEL, E. — Voir RYTER, A.
CARRET, G. — Voir COMBY, S.
CARVALHO, M.A.R. — Voir AVILA-CAMPOS, M.J.
CAUDWELL, A. — Voir SCHWARTZ, Y.
CHARRON, A. — Voir MAUREL, D.
CHARTONE-SOUZA, E. — Voir AVILA-CAMPOS, M.J.
CHASLUS-DANCLA, E. — Voir PERRIN, B.
CHEVRIER, D. — Voir GRIMONT, F.
CISALPINO, E.O. — Voir AVILA-CAMPOS, M.J.
CLEMENT, R.L. — Voir FLATAU, G.N.
COLE, S.T. — A breath of fresh air — respiratory control demystified ... 277
COMBY, S., FLANDROIS, J.P., CARRET, G. and PICHAT, C. — Mathematical modelling of growth of *Escherichia coli* at subinhibitory levels of chloramphenicol or tetracyclines 243
COSSART, P. — Voir GORMLEY, E.
COULET, M. — Voir FLEURETTE, J.
COULON, J. — Voir MPONA-MINGA, M.
COURTIEU, A. — Voir MOINARD, D.
CRUAUD, P. — Voir PAPA, F.
DAMASCENO, C.A.V. — Voir AVILA-CAMPOS, M.J.
DAVID, H.L. — Voir PAPA, F.

DAVID, H.L. — Voir RASTOGI, N.
DELMAS, C.L. — Voir AHMEDY, A.M.C.
DEMCHUK, B. — Voir SALFINGER, M.
DENIS, M. — Voir BONIN, P.
DRUGEON, H. — Voir MOINARD, D.
DUTILH, B., BÉBÉAR, C., RODRIGUEZ, P., VEKRIS, A., BONNET, J. and GARRET, M. — Specific amplification of a DNA sequence common to all *Chlamydia trachomatis* serovars using the polymerase chain reaction .. 7
EL MANOUNI, D. — Voir JUPEAU-VESSIÈRES, A.N.
ENARD, C. — Voir AUMONT, P.
ETIENNE, J. — Voir FLEURETTE, J.
EXPERT, D. — Voir AUMONT, P.
FABREGAS, J., MUNOZ, A., LLOVO, J. and VILLA, T.G. — Differentiation of *Candida guilliermondii* varieties by lectin-like substances from marine algae 373
FALCON, M.A. — Voir BRITO, N.
FARIAS, L.M. — Voir AVILA-CAMPOS, M.J.
FAUCHÈRE, J.-L., KERVELLA, M., ROSENAU, A., MOHANNA, K. and VÉRON, M. — Adhesion to HeLa cells of *Campylobacter jejuni* and *C. coli* outer membrane components 379
FERRARA-GUERRERO, M.J. and BIANCHI, A. — Comparison of culture methods for enumeration of microaerophilic bacteria in marine sediments 255
FLANDROIS, J.P. — Voir COMBY, S.
FLATAU, G.N., CLÉMENT, R.L., MAHDYOUN, F., LEBLANC, G. and GAUTHIER, M.J. — Role of transmembrane electrical potential on cadmium fixation by a marine pseudomonad 553
FLEURETTE, J., BÈS, M., BRUN, Y., FRENEY, J., FOREY, F., COULET, M., REVERDY, M.E. and ETIENNE, J. — Clinical isolates of *Staphylococcus lugdunensis* and *S. schleiferi:* bacteriological characteristics and susceptibility to antimicrobial agents 107
FLEURETTE, J. — Voir BORNSTEIN, N.
FLEURETTE, J. — Voir PEYRET, M.
FOREY, F. — Voir FLEURETTE, J.
FRENEY, J. — Voir FLEURETTE, J.
FRENEY, J. — Voir PEYRET, M.
GÁLVEZ, A., MAQUEDA, M., MARTINEZ-BUENO, M. and VALDIVIA, E. — Bactericidal and bacteriolytic action of peptide antibiotic AS-48 against Gram-positive and Gram-negative bacteria and other organisms 57
GARRET, M. — Voir DUTILH, B.
GAUTHIER, M.J. — Voir FLATAU, G.N.
GEORGES, A.J. — Voir GEORGES-COURBOT, M.C.
GEORGES, A.J. — Voir KIRIMAT, M.
GEORGES-COURBOT, M.C., GOUANDJIKA, I., MARTIN, P.M.V. and GEORGES, A.J. — Biotype and Lior serogroup distribution of enteric *Campylobacter* isolated from children in Bangui (Central African Republic), and comparison with Penner serotypes 489
GEORGES-COURBOT, M.C. — Voir KIRIMAT, M.
GERBAUD, G.R. — Voir JUPEAU-VESSIÈRES, A.N.
GILEWICZ, M. — Voir BONIN, P.
GILLY, L. — Voir VEDEL, G.
GILSON, E. — Multipurpose role for RAP1, a yeast DNA looping protein 433
GOH, K.S. — Voir RASTOGI, N.
GOLD, F. — Voir RASTEGAR LARI, A.
GORMLEY, E., MENGAUD, J. and COSSART, P. — Sequences homologous to the listeriolysin O gene region of *Listeria monocytogenes* are present in virulent and avirulent haemolytic species of the genus *Listeria* 631
GOUANDJIKA, I. — Voir GEORGES-COURBOT, M.C.

GOULLET, P., BRANGER, C., PHILIPPE, J.C. and PICARD, B. — Isolation and properties of carboxylesterase P_4 from *Yersinia pseudotuberculosis* ... 221
GRANGE, J. — Voir SCHWARTZ, Y.
GRIFFAIS, R. and THIBON, M. — Detection of *Chlamydia trachomatis* by the polymerase chain reaction 139
GRIMONT, F., CHEVRIER, D., GRIMONT, P.A.D., LEFEVRE, M. and GUESDON, J.-L. — Acetylaminofluorene-labelled ribosomal RNA for use in molecular epidemiology and taxonomy 447
GRIMONT, F., LEFEVRE, M., AGERON, E. and GRIMONT, P.A.D. — rRNA gene restriction patterns of *Legionella* species: a molecular identification system 615
GRIMONT, F. — Voir BORNSTEIN, N.
GRIMONT, P.A.D. and AGERON, E. — *Enterobacter cancerogenus* (Urošević, 1966) Dickey and Zumoff 1988, a senior subjective synonym of *Enterobacter taylorae* Farmer *et al.* (1985) 459
GRIMONT, P.A.D. — Voir BORNSTEIN, N.
GRIMONT, P.A.D. — Voir GRIMONT, F.
GRIMONT, P.A.D. — Voir KHAMMAS, K.M.
GROOTHUIS, D.G. — Voir VERSTIJNEN, C.P.H.J.
GUESDON, J.-L. — Voir GRIMONT, F.
GUTIERREZ-NAVARRO, A.M. — Voir BRITO, N.
HACKEL, C. — Voir HOUARD, S.
HARF, C. — Voir MIRGAIN, I.
HERZOG, A. — Voir HOUARD, S.
HIKITA, C., SATAKE, Y., YAMADA, H., MIZUNO, T. and MIZUSHIMA, S. — Structural and functional characterization of the OmpF and OmpC porins of the *Escherichia coli* outer membrane: studies involving chimeric proteins 177

INDEX OF KEY-WORDS

Acetylaminofluorene, rRNA, Hybridization; Labelling, Molecular epidemiology, Taxonomy 447
Acheloplasma laidlawii, DNA polymerase, *Mycoplasma mycoides, Mycoplasma orale, Ureaplasma urealyticum;* 3'-5'Exonuclease, Phylogeny 191
Acinetobacter; DNA/DNA hybridization, Phenotype, Taxonomy 291
Acinetobacter, Glucose dehydrogenase, Pyrroloquinoline quinone, Carbohydrate; Utilization test, Taxonomy 531
Actinobacillus actinomycetemcomitans, Mercuric chloride; MIC 51
Adherence, Enteritis, *Campylobacter jejuni, Campylobacter coli;* Outer membrane antigens, Cell-binding fraction, HeLa cells 379
Adherence, Epithelium, *Staphylococcus aureus, Streptococcus pneumoniae;* Surface charge, Hydrophobicity, Electrophoresis; Note 563
Aerobactin, *Escherichia coli,* Enterobactin, Haemolysin, Bacteraemia, Cancer; Resistance to serum 21
Agglutination, *Candida guilliermondii,* Lectin; Algae, Yeast identification tests 373
Amino acid, Bacterial growth, Steady-state; Transport, Incorporation, Kinetics, *Escherichia coli* 517
Aminoglycoside, DNA, Non-radioactive probe, *Escherichia coli, Salmonella;* Resistance, Colony hybridization, Epidemiology 27
Amphotericin B, *Candida albicans,* Cell wall; Biosynthesis, Dose, Chitin . 95
Antibiotic, *Escherichia coli, Enterobacteriaceae,* Premature; *Per os,* Antagonism 69
Antigenicity, Tuberculosis, *Mycobacterium,* Glycolipid, Specificities, Serodiagnosis 569
AS-48, Peptide antibiotic, Cell wall, Bactericidal action; Spectrum 57
Azospirillum irakense, Nitrogen fixation, Rice, Rhizosphere; DNA relatedness, New species 679
Bacteraemia, *Escherichia coli,* Aerobactin, Enterobactin; Haemolysin, Cancer; Resistance to serum 21
Bacterial growth, Amino acid, Steady-state; Transport, Incorporation, Kinetics, *Escherichia coli* 517
Bacterial growth, *Escherichia coli,* Chloramphenicol, Tetracycline, Mathematical modelling; Subinhibitory concentrations 243
Bacterial growth, *Mycobacterium lepraemurium,* Leprosy; Doubling time, Mouse footpad 43
Bactericidal action, Peptide antibiotic, AS-48, Cell wall; Spectrum 57
Bacteriolysis, *Pseudomonas aeruginosa,* Peptidase, Glycine; Extracellular enzyme, Cell wall 125
Bacteriophage, Plasmid, Pilus, Conjugation; Thermosensitivity, Retraction 439
Bordetella pertussis, DNA, Polymerase chain reaction; Enzymatic amplification, Genome, Diagnosis 477
Borrelia burgdorferi, DNA, Lyme disease, Genome, Plasmid; Chromosome, Pulse-field gel electrophoresis 507

Cadmium, Cellular energy, Pseudomonad, Ionophore, Mureinoplast; Fixation, Transmembrane potential 553
Campylobacter; Biotype, Serogroup, Bangui, Children 489
Campylobacter, Flagellin, Epitope, Motility, Diarrhoea; Immunochemistry, Phases 645
Campylobacter coli, Enteritis, *Campylobacter jejuni,* Adherence; Outer membrane antigens, Cell-binding fraction, HeLa cells 379
Campylobacter jejuni, Enteritis, *Campylobacter coli,* Adherence; Outer membrane antigens, Cell-binding fraction, HeLa cells 379
Cancer, *Escherichia coli,* Aerobactin, Enterobactin, Haemolysin, Bacteraemia; Resistance to serum 21
Candida albicans, Cell wall, Amphotericin B; Biosynthesis, Dose, Chitin . 95
Candida guilliermondii, Agglutination, Lectin; Algae, Yeast identification tests 373
Carbenicillin, β-Lactamase, β-Lactam, *Yersinia kristensenii, Yersinia;* Susceptibility, Food analysis 667
Carbenicillinase, β-Lactamase; Molecular comparison, Electrophoresis methods, PSE 579
Carbohydrate, *Acinetobacter,* Glucose dehydrogenase, Pyrroloquinoline quinone; Utilization tests, Taxonomy 531
Cell wall, *Candida albicans,* Amphotericin B; Biosynthesis, Dose, Chitin . 95
Cell wall, OmpC protein, *Yersinia enterocolitica,* Porin; Purification, Properties 599
Cell wall, Peptide antibiotic, AS-48, Bactericidal action; Spectrum 57
Cellular energy, Cadmium, Pseudomonad, Ionophore, Mureinoplast; Fixation, Transmembrane potential 553
Chemosusceptibility, *Mycobacterium;* Thiacetazone, Hydroxylamine, *Para*-nitrobenzoic acid, Diagnosis 235
Chlamydia trachomatis, DNA; Diagnosis, Polymerase chain reaction 139
Chlamydia trachomatis, DNA, Enzymatic amplification; Major outer membrane protein, Polymerase chain reaction, Diagnosis 7
Chloramphenicol, *Escherichia coli,* Tetracycline, Bacterial growth, Mathematical modelling; Subinhibitory concentrations 243
Cholera toxin, Enterotoxin, *Escherichia coli,* Ganglioside, Red blood cell receptor; Thermosensitivity 393
Conjugation, Plasmid, Pilus, Bacteriophage; Thermosensitivity, Retraction 439
Dapsone, *Mycobacterium leprae,* Leprosy, Rifampicin; Antagonism, Bacillary persistence, Mouse 143
Denitrification, Seawater, *Pseudomonas nautica;* Halophilic bacterium, Cations 159
Diarrhoea, *Campylobacter,* Flagellin, Epitope, Motility; Immunochemistry, Phases 645
DNA, *Bordetella pertussis,* Polymerase chain reaction; Enzymatic amplification, Genome, Diagnosis 477
DNA, *Borrelia burgdorferi,* Lyme disease, Genome, Plasmid; Chromosome, Pulse-field gel electrophoresis 507
DNA, *Chlamydia trachomatis;* Diagnosis, Polymerase chain reaction 139
DNA, *Chlamydia trachomatis,* Enzymatic amplification; Major outer membrane protein, Polymerase chain reaction, Diagnosis 7
DNA, *Enterobacter cancerogenus, Enterobacter taylorae;* Relatedness, Taxonomy 459
DNA, Gene *glnA,* Glutamine synthetase, *Methanococcus voltae;* Archaebacteria, Sequencing, Expression 355
DNA, Non-radioactive probe, *Escherichia coli, Salmonella,* Aminoglycoside; Resistance, Colony hybridization, Epidemiology 27
DNA, Urease, *Ureaplasma urealyticum,* Hybridization; *Providencia stuartii,* Genetic homology 281
DNA polymerase, *Mycoplasma mycoides, Mycoplasma orale, Ureaplasma urealyticum, Acholeplasma laidlawii;* 3'-5'Exonuclease, Phylogeny 191

Drug susceptibility, *Mycobacterium tuberculosis,* Tuberculosis; Testing methods, Media 405
Encephalitis, *Spiroplasma mirum,* Oxygen, Trimethoprim, Sulphomethoxazole; Rat 151
Enteritis, *Campylobacter jejuni, Campylobacter coli,* Adherence; Outer membrane antigens, Cell-binding fraction, HeLa cells 379
Enterobacter cancerogenus, DNA, *Enterobacter taylorae;* Relatedness, Taxonomy 459
Enterobacter taylorae, DNA, *Enterobacter cancerogenus;* Relatedness, Taxonomy 459
Enterobacteriaceae, Escherichia coli, Antibiotic, Premature; *Per os,* Antagonism 69
Enterobacteriaceae, Yersinia pseudotuberculosis, Esterase; Chromatography, Taxonomy 221
Enterobactin, *Escherichia coli,* Aerobactin, Haemolysin, Bacteraemia, Cancer; Resistance to serum 21
Enterotoxin, Cholera toxin, *Escherichia coli,* Ganglioside, Red blood cell receptor; Thermosensitivity 393
Enzymatic amplification, *Chlamydia trochomatic,* DNA; Major outer membrane protein, Polymerase chain reaction, Diagnosis 7
Enzyme typing, *Mycobacterium;* Diagnosis, Numerical profile 33
Epithelium, *Staphylococcus aureus, Streptococcus pneumoniae,* Adherence; Surface charge, Hydrophobicity, Electrophoresis; Note 563
Epitope, *Campylobacter,* Flagellin, Motility, Diarrhoea; Immunochemistry, Phases 645
Escherichia coli, Aerobactin, Enterobactin, Haemolysin, Bacteraemia, Cancer; Resistance to serum 21
Escherichia coli, Chloramphenicol, Tetracycline, Bacterial growth, Mathematical modelling; Subinhibitory concentrations 243
Escherichia coli, Cholera toxin, Enterotoxin, Ganglioside, Red Blood cell receptor; Thermosensitivity 393
Escherichia coli, DNA, Non-radioactive probe, *Salmonella,* Aminoglycoside; Resistance, Colony hybridization, Epidemiology 27
Escherichia coli, Enterobacteriaceae, Antibiotic, Premature; *Per os,* Antagonism 69
Escherichia coli, Outer membrane, Porin; OmpF, OmpC, Chimeric protein 177
Escherichia coli, R plasmid, Tetracycline, Minocycline; *tetB* determinant, NMR, HPLC 207
Esterase, *Yersinia pseudotuberculosis, Enterobacteriaceae;* Chromatography, Taxonomy 221
Flagellin, *Campylobacter,* Epitope, Motility, Diarrhoea; Immunochemistry, Phases 645
G+C content, *Staphylococcus, Micrococcus;* Identification, High performance liquid chromatography 467
Ganglioside, Cholera toxin, Enterotoxin, *Escherichia coli,* Red blood cell receptor; Thermosensitivity 393
Gene *glnA,* Glutamine synthetase, DNA, *Methanococcus voltae;* Archaebacteria, Sequencing, Expression 355
Gene restriction, Plasmid pKK3535, rRNA; Patterns, Non-radioactive probe, Epidemiology 325
Gene restriction, rRNA, *Legionella;* Molecular epidemiology, Taxonomy . 615
Genome, DNA, *Borrelia burgdorferi,* Lyme disease, Plasmid; Chromosome, Pulse-field gel electrophoresis 507
Glucose, *Streptococcus,* Microbial nutrition, Lactic acid; Biotyping, Classification 119
Glucose dehydrogenase, *Acinetobacter,* Pyrroloquinoline quinone, Carbohydrate; Utilization tests, Taxonomy 531

Glutamine synthetase, Gene *glnA,* DNA, *Methanococcus voltae;* Archaebacteria, Sequencing, Expression 355
Glycine, *Pseudomonas aeruginosa,* Bacteriolysis, Peptidase; Extracellular enzyme, Cell wall 125
Glycolipid, Tuberculosis, *Mycobacterium,* Antigenicity; Specificities, Serodiagnosis 569
Haemolysin, *Escherichia coli,* Aerobactin, Enterobactin, Bacteraemia, Cancer; Resistance to serum 21
hlyA gene, *Listeria monocytogenes,* Listeriolysin O, Virulence; SH-activated haemolysin, DNA probe 631
Hybridization, rRNA, Acetylaminofluorene; Labelling, Molecular epidemiology, Taxonomy 447
Hybridization, Urease, *Ureaplasma urealytitum,* DNA; *Providencia stuartii,* Genetic homology 281
Immunodiagnosis, *Mycobacterium tuberculosis, Mycobacterium;* mAb, Western blot, Immunofluorescence 653
Ionophore, Cellular energy, Cadmium, Pseudomonad, Mureinoplast; Fixation, Transmembrane potential 553
β-Lactam, β-Lactamase, *Yersinia kristensenii, Yersinia,* Carbenicillin; Susceptibility, Food analysis 667
β-Lactamase, Carbenicillinase; Molecular comparison, Electrophoresis methods, PSE 579
β-Lactamase, β-Lactam, *Yersinia kristensenii, Yersinia,* Carbenicillin; Susceptibility, Food analysis 667
Lactic acid, *Streptococcus,* Glucose, Microbial nutrition; Biotyping, Classification 119
Lectin, *Candida guilliermondii,* Agglutination; Algae, Yeast identification tests 373
Legionella, rRNA, Gene restriction; Molecular epidemiology, Taxonomy . 615
Legionella gratiana, Spa water; New species, Taxonomy 541
Leprosy, *Mycobacterium leprae,* Dapsone, Rifampicin; Antagonism, Bacillary persistence, Mouse 143
Leprosy, *Mycobacterium lepraemurium,* Bacterial growth; Doubling time, Mouse footpad 43
Listeria monocytogenes, hlyA gene, Listeriolysin O, Virulence; SH-activated haemolysin, DNA probe 631
Listeriolysin O, *Listeria monocytogenes, hlyA* gene, Virulence; SH-activated haemolysin, DNA probe 631
Lyme disease, DNA, *Borrelia burgdorferi,* Genome, Plasmid; Chromosome, Pulse-field gel electrophoresis 507
Mathematical modelling, *Escherichia coli,* Chloramphenicol, Tetracycline, Bacterial growth; Subinhibitory concentrations 243
Mercuric chloride, *Actinobacillus actinomycetemcomitans;* MIC 51
Mercury, *Pseudomonas,* Water; Pollution, Biodegradation, HPLC, Hg-resistant species 695
Methanococcus voltae, Gene *glnA,* Glutamine synthetase, DNA; Archaebacteria, Sequencing, Expression 355
Microaerophilia, Seawater; Sediment, Bacterial flora, Enumeration, Methods 255
Microbial nutrition, *Streptococcus,* Glucose, Lactic acid; Biotyping, Classification 119
Micrococcus, G+C content, *Staphylococcus;* Identification, High performance liquid chromatography 467
Minocycline, R plasmid, *Escherichia coli,* Tetracycline; *tetB* determinant, NMR, HPLC 207
MLO, Phytopathology, *Mycoplasma;* Flavescence dorée, Grapevine, mAb, ELISA 311
Motility, *Campylobacter,* Flagellin, Epitope, Diarrhoea; Immunochemistry, Phases 645

MOTT, *Mycobacterium tuberculosis;* Tuberculosis, Diagnostic tests, NAP, PNB 419
Mureinoplast, Cellular energy, Cadmium, Pseudomonad, Ionophore; Fixation, Transmembrane potential 553
Mycobacterium, Chemosusceptibility; Thiacetazone, Hydroxylamine, *Para*-nitrobenzoic acid, Diagnosis 235
Mycobacterium, Enzyme typing; Diagnosis, Numerical profile 33
Mycobacterium, Mycobacterium tuberculosis, Immunodiagnosis; mAb, Western blot, Immunofluorescence 653
Mycobacterium, Tuberculosis, Glycolipid, Antigenicity; Specificities, Serodiagnosis 569
Mycobacterium leprae, Leprosy, Dapsone, Rifampicin; Antagonism, Bacillary persistence, Mouse 143
Mycobacterium leprae, Palmitic acid; Oxidation, Inhibitors, Oxygen uptake 83
Mycobacterium lepraemurium, Bacterial growth, Leprosy; Doubling time, Mouse footpad 43
Mycobacterium tuberculosis, Drug susceptibility, Tuberculosis; Testing methods, Media 405
Mycobacterium tuberculosis, Immunodiagnosis, *Mycobacterium;* mAb, Western blot, Immunofluorescence 653
Mycobacterium tuberculosis, MOTT; Tuberculosis, Diagnostic tests, NAP, PNB 419
Mycobacterium tuberculosis, Pyrazinamide, pH; Susceptibility testing, BACTEC system 301
Mycoplasma, MLO, Phytopathology; Flavescence dorée, Grapevine, mAb, ELISA 311
Mycoplasma mycoides, DNA polymerase, *Mycoplasma orale, Ureaplasma urealyticum, Acholeplasma laidlawii;* 3'-5'Exonuclease, Phylogeny 191
Mycoplasma orale, DNA polymerase, *Mycoplasma mycoides, Ureaplasma urealyticum, Acholeplasma laidlawii;* 3'-5'Exonuclease, Phylogeny 191
Nitrogen fixation, *Azospirillum irakense,* Rice, Rhizosphere; DNA relatedness, New species 679
Non-radioactive probe, DNA, *Escherichia coli, Salmonella,* Aminoglycoside; Resistance, Colony hybridization, Epidemiology 27
Nucleotide, *Salmonella typhimurium,* Virulence, Plasmid; Séquence, Note 263
Nucleotide, *Salmonella typhimurium,* Virulence, Plasmid; Sequencing; Note 455
OmpC protein, *Yersinia enterocolitica,* Cell wall, Porin; Purification, Properties 599
Outer membrane, *Escherichia coli,* Porin; OmpF, OmpC, Chimeric protein 177
Oxygen, *Spiroplasma mirum,* Trimethoprim, Sulphomethoxazole, Encephalitis; Rat 151
Palmitic acid, *Mycobacterium leprae;* Oxidation, Inhibitors, Oxygen uptake 83
Peptidase, *Pseudomonas aeruginosa,* Bacteriolysis, Glycine; Extracellular enzyme, Cell wall 125
Peptide antibiotic, AS-48, Cell wall, Bactericidal action; Spectrum 57
pH, *Mycobacterium tuberculosis,* Pyrazinamide; Susceptibility testing, BACTEC system 301
Phytopathology, MLO, *Mycoplasma;* Flavescence dorée, Grapevine, mAb, ELISA 311
Pilus, Plasmid, Conjugation, Bacteriophage; Thermosensitivity, Retraction 439
Plasmid, DNA, *Borrelia burgdorferi,* Lyme disease, Genome; Chromosome, Pulse-field gel electrophoresis 507
Plasmid, Pilus, Conjugation, Bacteriophage; Thermosensitivity, Retraction 439
Plasmid, *Salmonella typhimurium,* Virulence, Nucleotide; Séquence, Note 263
Plasmid, *Salmonella typhimurium,* Virulence, Nucleotide; Sequencing; Note 455
Plasmid, *Salmonella typhimurium,* Virulence; Nucleotides, Sequencing; Note 627
Plasmid pKK3535, rRNA, Gene restriction; Patterns, Non-radioactive probe, Epidemiology 325

Polymerase chain reaction, *Bordetella pertussis,* DNA; Enzymatic amplification, Genome, Diagnosis 477
Porin, *Escherichia coli,* Outer membrane; OmpF, OmpC, Chimeric protein 177
Porin, OmpC protein, *Yersinia enterocolitica,* Cell wall; Purification, Properties 599
Premature, *Escherichia coli, Enterobacteriaceae,* Antibiotic; *Per os,* Antagonism 69
Pseudomonad, Cellular energy, Cadmium, Ionophore, Mureinoplast; Fixation, Transmembrane potential 553
Pseudomonas, Mercury, Water; Pollution, Biodegradation, HPLC, Hg-resistant species 695
Pseudomonas aeruginosa, Bacteriolysis, Peptidase, Glycine; Extracellular enzyme, Cell wall 125
Pseudomonas cepacia; New serotypes, O and H antigens 17
Pseudomonas nautica, Seawater, Denitrification; Halophilic bacterium, Cations 159
Pyrazinamide, *Mycobacterium tuberculosis,* pH; Susceptibility testing, BACTEC system 301
Pyrroloquinoline quinone, *Acinetobacter,* Glucose dehydrogenase, Carbohydrate; Utilization tests, Taxonomy 531
R plasmid, *Escherichia coli,* Tetracycline, Minocycline; *tetB* determinant, NMR, HPLC 207
Red blood cell receptor, Cholera toxin, Enterotoxin, *Escherichia coli,* Ganglioside; Thermosensitivity 393
Rhizosphere, *Azospirillum irakense,* Nitrogen fixation, Rice; DNA relatedness, New species 679
Rice, *Azospirillum irakense,* Nitrogen fixation, Rhizosphere; DNA relatedness, New species 679
Rifampicin, *Mycobacterium leprae,* Leprosy, Dapsone; Antagonism, Bacillary persistence, Mouse 143
rRNA, Acetylaminofluorene, Hybridization; Labelling, Molecular epidemiology, Taxonomy 447
rRNA, *Legionella,* Gene restriction; Molecular epidemiology, Taxonomy . 615
rRNA, Plasmid pKK3535, Gene restriction; Patterns, Non-radioactive probe, Epidemiology 325
Salmonella, DNA, Non-radioactive probe, *Escherichia coli,* Aminoglycoside; Resistance, Colony hybridization, Epidemiology 27
Salmonella; Serovar, Taxonomy, Supplement to Kauffmann-White Scheme 335
Salmonella typhimurium, Plasmid, Virulence; Nucleotides, Sequencing; Note 627
Salmonella typhimurium, Virulence, Plasmid, Nucleotide; Séquence, Note 263
Salmonella typhimurium, Virulence, Plasmid, Nucleotide; Sequencing; Note 455
Seawater, Denitrification, *Pseudomonas nautica;* Halophilic bacterium, Cations 159
Seawater, Microaerophilia; Sediment, Bacterial flora, Enumeration, Methods 255
Spa water, *Legionella gratiana;* New species, Taxonomy 541
Spiroplasma mirum, Oxygen, Trimethoprim, Sulphomethoxazole, Encephalitis; Rat 151
Staphylococcus, G+C content, *Micrococcus;* Identification, High performance liquid chromatography 467
Staphylococcus aureus, Epithelium, *Streptococcus pneumoniae,* Adherence; Surface charge, Hydrophobicity, Electrophoresis; Note 563
Staphylococcus lugdunensis, Staphylococcus schleiferi; Clinical isolates, Bacteriological characteristics, Antimicrobial susceptibility 107
Staphylococcus schleiferi, Staphylococcus lugdunensis; Clinical isolates, Bacteriological characteristics, Antimicrobial susceptibility 107
Steady-state, Amino acid, Bacterial growth; Transport, Incorporation, Kinetics, *Escherichia coli* 517
Streptococcus, Glucose, Microbial nutrition, Lactic acid; Biotyping, Classification 119

Streptococcus pneumoniae, Epithelium, *Staphylococcus aureus,* Adherence; Surface charge, Hydrophobicity, Electrophoresis; Note 563
Sulphomethoxazole, *Spiroplasma mirum,* Oxygen, Trimethoprim, Encephalitis; Rat 151
Tetracycline, *Escherichia coli,* Chloramphenicol, Bacterial growth, Mathematical modelling; Subinhibitory concentrations 243
Tetracycline, R plasmid, *Escherichia coli,* Minocycline; *tetB* determinant, NMR, HPLC 207
Trimethoprim, *Spiroplasma mirum,* Oxygen, Sulphomethoxazole, Encephalitis; Rat 151
Tuberculosis, *Mycobacterium,* Glycolipid, Antigenicity; Specificities, Serodiagnosis 569
Tuberculosis, *Mycobacterium tuberculosis,* Drug susceptibility; Testing methods, Media 405
Ureaplasma urealyticum, DNA polymerase, *Mycoplasma mycoides, Mycoplasma orale, Acholeplasma laidlavii;* 3'-5'Exonuclease, Phylogeny 191
Ureaplasma urealyticum, Urease, DNA, Hybridization; *Providencia stuartii,* Genetic homology 281
Urease, *Ureaplasma urealyticum,* DNA, Hybridization; *Providencia stuartii,* Genetic homology 281
Virulence, *Listeria monocytogenes, hlyA* gene, Listeriolysin O; SH-activated haemolysin, DNA probe 631
Virulence, *Salmonella typhimurium,* Plasmid, Nucleotide; Séquence, Note 263
Virulence, *Salmonella typhimurium,* Plasmid, Nucleotide; Sequencing; Note 455
Virulence, *Salmonella typhimurium,* Plasmide; Nucleotides, Sequencing; Note 627
Water, *Pseudomonas,* Mercury; Pollution, Biodegradation, HPLC, Hg-resistant species 695
Yersinia enterocolitica, OmpC protein, Cell wall, Porin; Purification, Properties 599
Yersinia kristensenii, β-Lactamase, β-Lactam, *Yersinia,* Carbenicillin; Susceptibility, Food analysis 667
Yersinia pseudotuberculosis, Enterobacteriaceae, Esterase; Chromatography, Taxonomy 221

INDEX OF ARTICLES PUBLISHED

Tome 140

Editorial, M. HOFNUNG 5
Specific amplification of a DNA sequence common to all *Chlamydia trachomatis* serovars using the polymerase chain reaction, B. DUTILH, C. BÉBÉAR, P. RODRIGUEZ, A. VEKRIS, J. BONNET and M. GARRET 7
New serotypes of *Pseudomonas cepacia,* B. WERNEBURG and H. MONTEIL . 17
Production of haemolysin, aerobactin and enterobactin by strains of *Escherichia coli* causing bacteraemia in cancer patients and their resistance to human serum, P. AUMONT, C. ENARD, D. EXPERT, C. PIEDDELOUP, C. TANCREDE and A. ANDREMONT 21
Utilisation de sondes non radioactives pour la détection du gène de la 3-aminoside-acétyltransférase type IV chez des souches de *Escherichia coli* et *Salmonella* spp, B. PERRIN, M. SALSONA, E. CHASLUS-DANCLA et J.L. MARTEL 27
Rapid identification of *Mycobacterium* species, D. MOINARD, B. CARBONNELLE, A. COURTIEU and H. DRUGEON 33
Doubling time of *Mycobacterium lepraemurium* in mouse footpads, F. SILBAQ, L. LEVY and H. BERCOVIER 43
Actinobacillus (haemophilus) actinomycetemcomitans: resistance to mercuric chloride of 41 strains isolated in Brazil, M.J. AVILA-CAMPOS, L.M. FARIAS, M.A.R. CARVALHO, C.A.V. DAMASCENO, E. CHARTONE-SOUZA and E.O. CISALPINO 51
Bactericidal and bacteriolytic action of peptide antibiotic AS-48 against Gram-positive and Gram-negative bacteria and other organisms, A. GALVEZ, M. MAQUEDA, M. MARTINEZ-BUENO and E. VALDIVIA 57
Administration précoce d'une souche de *Escherichia coli* antibiosensible dans l'intestin du nouveau-né prématuré, A. RESTEGAR LARI, J.C. BORDERON, F. GOLD et J. LAUGIER 69
Direct evidence for the oxidation of palmitic acid by host-grown *Mycobacterium leprae,* M. ISHAQUE 83
Effects of subinhibitory dose of amphotericin B on cell wall biosynthesis in *Candida albicans,* M. MPONA-MINGA, J. COULON and R. BONALY 95
Clinical isolates of *Staphylococcus lugdunensis* and *S. schleiferi:* bacteriological characteristics and susceptibility to antimicrobial agents, J. FLEURETTE, M. BÉS, Y. BRUN, J. FRENEY, F. FOREY, M. COULET, M.F. REVERDY and J. ETIENNE 107
Fermentation products of nutritionally variant streptococci: additional evidence for their classification in the genus *Streptococcus,* J.P. CARLIER and A. BOUVET 119
Purification and peptidase activity of a bacteriolytic extracellular enzyme from *Pseudomonas aeruginosa,* N. BRITO, M.A. FALCÓN, A. CARNICERO, A.M. GUTIERREZ-NAVARRO and T.B. MANSITO 125

Detection of *Chlamydia trachomatis* by the polymerase chain reaction, R. GRIFFAIS and M. THIBON 139
Antagonism between dapsone and rifampicin in experimental *Mycobacterium leprae* infections in mice, J.P. MILLAN and J.P. MOULIA-PELAT 143
Effect of trimethoprim/sulphomethoxazole and hyperbaric oxygen on experimental *Spiroplasma mirum* encephalitis, F.O. BASTIAN, R.A. JENNINGS and C.J. HOFF 151
Salt requirements in the denitrifying bacterium *Pseudomonas nautica* 617, P. BONIN, M. GILEWICZ, M. DENIS and J.C. BERTRAND 159
Structural and functional characterization of the OmpF and OmpC porins of the *Escherichia coli* outer membrane: studies involving chimeric proteins, C. HIKITA, Y. SATAKE, H. YAMADA, T. MIZUNO and S. MIZUSHIMA 177
Mollicutes DNA polymerases: characterization of a single enzyme from *Mycoplasma mycoides* and *Ureaplasma urealyticum* and of three enzymes from *Acholeplasma laidlawii,* D. MAUREL, A. CHARRON and C. BÉBÉAR 191
Evidence for broken minocycline by NMR and HPLC techniques: a new additional resistance mechanism mediated by *tetB* determinant, A.N. JUPEAU-VESSIÈRES, Y.G. LEROUX, M.R. SCAVIZZI, D. El MANOUNI and G.R. GERBAUD 207
Isolation and properties of carboxylesterase P_4 from *Yersinia pseudotuberculosis,* P. GOULLET, C. BRANGER, J.C. PHILIPPE and B. PICARD 221
Simplified diagnostic susceptibility testing of myconacteria against thiacetazone, hydroxylamine, *p*-nitrobenzoic acid and picric acid, A.P. BURNENS and U. VURMA-RAPP 235
Mathematical modelling of growth of *Escherichia coli* at subinhibitory levels of chloramphenicol or tetracyclines, S. COMBY, J.P. FLANDROIS, G. CARRET and C. PICHAT 243
Comparison of culture methods for enumeration of microaerophilic bacteria in marine sediments, M.J. FERRARA-GUERRERO and A. BIANCHI 255
Nucleotide sequence of the plasmid-borne virulence gene *mkf*A encoding a 28-kDa polypeptide from *Salmonella typhimurium,* F. NOREL, M.-R. PISANO, J. NICOLI and M.Y. POPOFF 263
Times and Trends
Chromosomal rearrangement during sporulation of *Bacillus subtilis* leads to the generation of a new sigma factor, G. RAPOPORT 275
A breath of fresh air — respiratory control demystified, S.T. COLE 277
Exploring the bacterial surface and floating on the dead sea, A. RYTER, C. MARCHAL, P. SANSONETTI and E. CARNIEL 279
Original articles
Cloning of *Ureaplasma urealyticum* DNA sequences showing genetic homology with urease genes from Gram-negative bacteria, A. BLANCHARD and M.F. BARILE 281
Delineation of new proteolytic genomic species in the genus *Acinetobacter,* P.J.M. BOUVET and S. JEANJEAN 291
Rapid radiometric method for pyrazimamide susceptibility testing of *Mycobacterium tuberculosis,* M. SALFINGER, L.B. RELLER, B. DEMCHUK and Z.T. JOHNSON 301
Orientation d'anticorps monoclonaux spécifiques de l'agent pathogène de type mycoplasme (MLO) de la flavescence dorée de la vigne, Y. SCHWARTZ, E. BOUDON-PADIEU, J. GRANGE, R. MEGNOZ et A. CAUDWELL 311
Bacterial molecular epidemiology based on a non-radioactive probe complementary to ribosomal RNA, M. ALTWEGG and L.W. MAYER 325
Supplément 1988 (n° 32) au schéma de Kauffmann-White, L. LE MINOR et J. BOCKEMÜHL 335
Times and Trends
Involvement of the bacterial phosphotransferase system in diverse mechanisms of transcriptional regulation, M.H. SAIER, Jr 349
Biology and pathogenicity of treponemes, C.W. PENN 352

Original articles

Nucleotide sequence and expression of the glutamine synthetase structural gene, *glnA,* of the archaebacterium *Methanococcus voltae,* O. POSSOT, L. SIBOLD and J.-P. AUBERT 355

Differentiation of *Candida guilliermondii* varieties by lectin-like substances from marine algae, J. FABREGAS, A. MUÑOZ, J. LLOVO and T.G. VILLA 373

Adhesion to HeLa cells of *Campylobacter jejuni* and *C. coli* outer membrane components, J.-J. FAUCHÈRE, M. KERVELLA, A. ROSENAU, K. MOHANNA and M. VÉRON 379

Erythrocyte receptors for cholera and heat-labile enterotoxins of *Escherichia coli,* L.C. RICCI, P.S. DE SIQUEIRA, W.M.S.C. TAMASHIRO and A.F. PESTANA DE CASTRO 393

Drug susceptibility testing in tuberculosis: a comparison of the proportion methods using Lowenstein-Jensen, Middlebrook 7H10 and 7H11 agar media and radiometric method, N. RASTOGI, K.S. GOH and H.L. DAVID 405

Selective inhibition of the *Mycobacterium tuberculosis* complex by *p*-nitro-α-acetylamino-β-hydroxypropiophenone (NAP) and *p*-nitrobenzoic acid (PNB) used in 7H11 agar medium, N. RASTOGI, K.S. GOH and H.L. DAVID .. 419

Times and Trends

Multipurpose role for RAP1, a yeast DNA looping protein, E. GILSON ... 433

Original articles

Conjugation system of IncC plasmid RA1, and the interaction of RA1 pili with specific RNA phage C-1, D.E. BRADLEY 439

Acetylaminofluorene-labelled ribosomal RNA for use in molecular epidemiology and taxonomy, F. GRIMONT, D. CHEVRIER, P.A.D. GRIMONT, M. LEFEVRE and J.-L. GUESDON 447

Nucleotide sequence of the plasmid-borne virulence gene *mkfB* from *Salmonella typhimurium,* F. NOREL, M.-R. PISANO, J. NICOLI and M.Y. POPOFF .. 455

Enterobacter cancerogenus (Urosević, 1966) Dickey and Zumoff 1988, a senior subjective synonym of *Enterobacter taylorae* Farmer *et al.* (1985), P.A.D. GRIMONT and E. AGERON 459

Determination of G+C content of DNA using high-performance liquid chromatography for the identification of staphylococci and micrococci, M. PEYRET, J. FRENEY, H. MEUGNIER and J. FLEURETTE 467

Specific identification of *Bordetella pertussis* by the polymerase chain reaction, S. HOUARD, C. HACKEL, A. HERZOG and A. BOLLEN 477

Biotype and Lior serogroup distribution of enteric *Campylobacter* isolated from children in Bangui (Central Africa Republic), and comparison with Penner serotypes, M.C. GEORGES-COURBOT, I. GOUANDJIKA, P.M.V. MARTIN and A.J. GEORGES 489

Linear chromosome of *Borrelia burgdorferi,* C. BARIL, C. RICHAUD, G. BARANTON and I. SAINT GIRONS 507

Activation of amino acid transport during steady-state growth of *Escherichia coli,* H.E. KUBITSCHEK and S.R. PAI 517

Glucose dehydrogenase activity in *Acinetobacter* species, P.J.M. BOUVET and O.M.M. BOUVET 531

Legionella gratiana sp. nov. isolated from French spa water, N. BORNSTEIN, D. MARMET, M. SURGOT, M. NOWICKI, H. MEUGNIER, J. FLEURETTE, E. AGERON, F. GRIMONT, P.A.D. GRIMONT, W.L. THACKER, R.F. BENSON and D.J. BRENNER 541

Role of transmembrane electrical potential on cadmium fixation by a marine pseudomonad, G.N. FLATAU, R.L. CLÉMENT, F. MAHDYOUN, L. LEBLANC and M.J. GAUTHIER 553

Streptococcus pneumoniae and *Staphylococcus aureus* surface properties in relation to their adherence to human buccal epithelial cells, G. BECK, E. PUCHELLE, G. PLOTKOWSKI and R. PESLIN 563

Antigenicity and specificity of selected glycolipid fractions from *Mycobacterium tuberculosis,* F. PAPA, P. CRUAUD and H.L. DAVID 569
The analysis of five carbenicillin-hydrolysing enzymes by electrophoretic methods, G. VEDEL, B. PICARD, G. PAUL, A. PHILIPPON, L. GILLY, R. KRISHNAMOORTHY and P. NÉVOT 579
The OmpC protein of *Yersinia enterocolitica:* purification and properties, K. BRZOSTEK, J. HREBENDA, R. BENZ and W. BOOS 599
rRNA gene restriction patterns of *Legionella* species: a molecular identification system, F. GRIMONT, M. LEFEVRE, E. AGERON and P.A.D. GRIMONT 615
A plasmid-borne virulence region (2.8 kb) from *Salmonella typhimurium* contains two open reading frames, F. NOREL, M.-R. PISANO, J. NICOLI and M.Y. POPOFF 627
Sequences homologous to the listeriolysis O gene region of *Listeria monocytogenes* are present in virulent and avirulent haemolytic species of the genus *Listeria,* E. GORMLEY, J. MENGAUD and P. COSSART 631
Antibodies to *Campylobacter* flagellin recognize epitopes common to phase 1 and phase 2 flagella, M. KIRIMAT, M.C. GEORGES-COURBOT, A.J. GEORGES and P.M.V. MARTIN 645
Rapid identification of cultured *Mycobacterium tuberculosis* with a panel of monoclonal antibodies in Western blot and immunofluorescence, C.P.H.J. VERSTIJNEN, R. SCHÖNINGH, S. KUIJPER, J. BRUINS, R.J. v. KETEL, D.G. GROOTHUIS and A.H.J. KOLK 653
Relationships between β-lactamase production and β-lactam susceptibility of environmental strains of *Yersinia kristensenii,* A.M.C. AHLEDY, D.J.M. VIDON, R. LABIA and C.L. DELMAS 667
Azospirillum irakense sp. nov., a nitrogen-forming bacterium associated with rice roots and rhisosphere soil, K.M. KHAMMAS, E. AGERON, P.A.D. GRIMONT and P. KAISER 679
Phenylmercuric acetate biodegradation by environmental strains of *Pseudomonas* species, I. MIRGAIN, B. WERNEBURG, C. HARF and H. MONTEIL 695
